VS Health Benefits — Search Performance Report

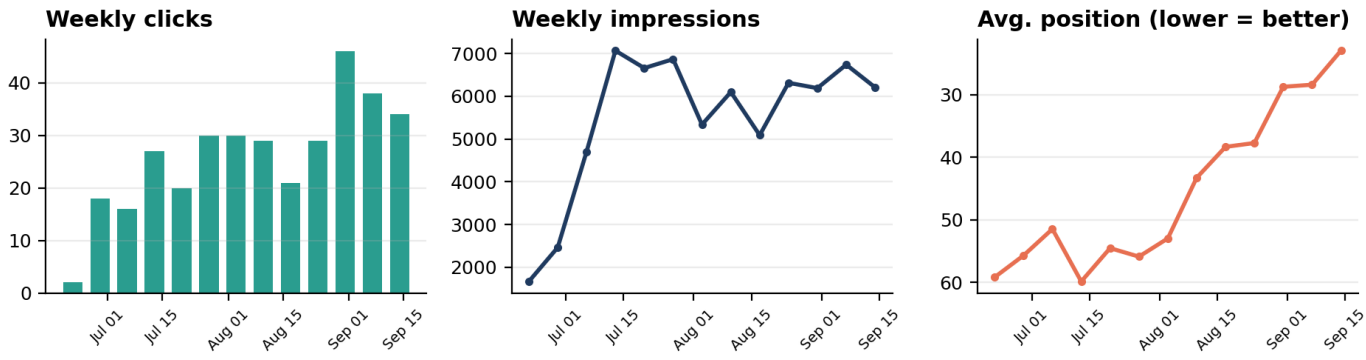

Google Search Console, web search, June 20 – Sept 19, 2026 (last 3 months) | Prepared Sept 21, 2026

343	71,857	0.48%	60 → 23
Clicks (3 months)	Impressions	Avg. click-through rate	Avg. position, first vs. last week

The short version

Your site is growing fast. Google is showing you about **14x more often** than in late June, and your average ranking climbed from page 6 to page 3. Weekly clicks went from ~3 to 35–45. September is on pace for roughly **175–180 clicks**, up about 45% from August (124).

The problem: you show up a lot but rarely get clicked. Only 0.48% of people who see you click, because most of your pages sit on page 3–7 of Google. And most of the clicks you *do* get come from people already searching your name. The fix is not more pages — you have 225 pages and **155 of them got zero clicks**. The fix is pushing your best 10–15 pages from page 2 onto page 1, and turning those visitors into quote requests.

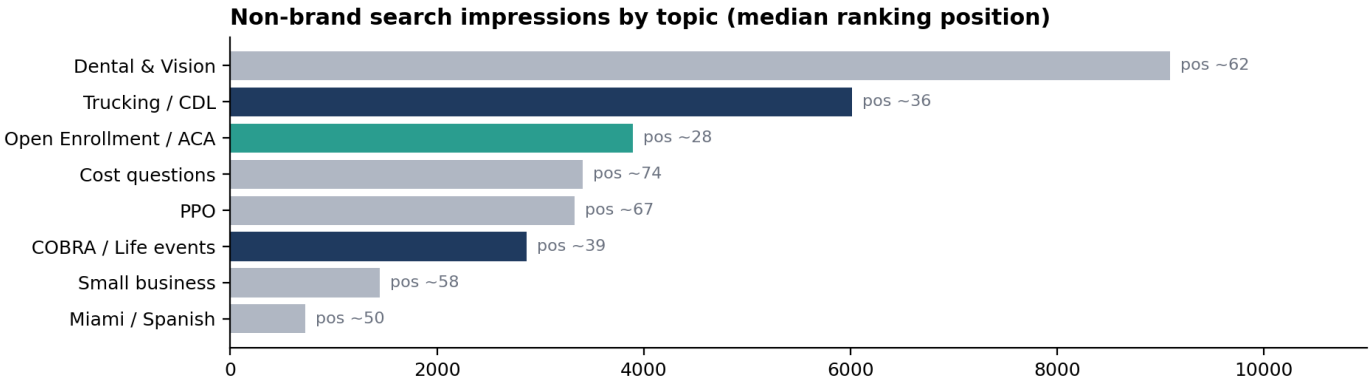

Partial first week (June 20–21) left out of the charts. Search Console data typically lags 2–3 days.

What is working

- **Your brand.** "vs health benefits" ranks #1.3 with a 21.7% click rate — 48 clicks. Your homepage (78 clicks) and your bio page /bradley-vilsaint (10.9% CTR) show people trust and look you up by name.
- **The ACA Subsidy Calculator is your best non-brand asset.** 74 clicks, 2.05% CTR. "aca calculator 2027" gets 14% CTR at position 5.6. Tools beat articles for you.
- **The 2027 Open Enrollment Guide is your biggest opportunity.** 8,451 impressions (most of any page) at position 13 — just off page 1, right before Open Enrollment starts Nov 1.
- **Mobile outperforms desktop.** Mobile ranks ~31 with 0.67% CTR vs. desktop at ~51 and 0.37%. Make sure the mobile quote/call buttons are front and center.

Where your visibility comes from

Teal = ranking around page 3 or better; navy = page 4–5; grey = page 5+ (effectively invisible). Based on the top 1,000 queries Google shared; many clicks come from queries Google hides for privacy.

Dental & vision drives the most impressions but ranks ~62 and produced 7 clicks from 14 pages. Your trucking niche is where you can realistically win: real buying-intent searches ("health insurance for owner operators", "health insurance for independent truckers") where you already sit at positions 36–40 — within reach. Only ~6,600 impressions (9%) came from outside the US; that is noise, ignore it.

Top pages

Page	Clicks	Impr.	CTR	Pos.	Read
/ (homepage)	78	1,562	4.99%	5.9	Healthy — mostly brand searches
/aca-subsidy-calculator	74	3,608	2.05%	27.0	Best lead magnet; push to page 1
/blog/aca-open-enrollment-2027-guide	26	8,451	0.31%	13.4	#1 priority before Nov 1
/blog/company-truck-driver-health-insurance	15	1,245	1.20%	27.6	Good CTR, needs ranking
/truck-driver-health-insurance	12	1,843	0.65%	49.0	Should be your trucking pillar
/truck-driver-health-insurance-cost	9	1,252	0.72%	16.9	Close to page 1
/best-health-insurance-owner-operators	8	2,000	0.40%	21.5	Close to page 1
/dental-vision-insurance	3	5,661	0.05%	71.3	Visible, not competitive
/ppo-health-insurance	0	4,025	0%	64.5	Too broad to rank
/how-much-does-health-insurance-cost	0	3,232	0%	191.5	Duplicate of a blog post

Quick wins: pages already close to page 1

These rank 4–20 with real impressions. A better title/description and a content refresh can move them onto page 1, where CTR typically jumps several-fold.

Page / query	Impr.	Pos.	Fix
/blog/aca-open-enrollment-2027-guide "when is open enrollment for health insurance 2027" (1,061 impr., pos 8.8)	8,451	13.4	Put the dates in the title (e.g. "2027 Open Enrollment: Nov 1 Start Date, Deadlines & Florida Tips"). Add a dates table at the top, FAQ section, "Get a free quote" button above the fold.
/health-insurance-open-enrollment-faq	1,595	18.5	Competes with the guide. Merge into the guide or link hard to it.
/truck-driver-health-insurance-cost	1,252	16.9	Add real price ranges by age/state and a quote form. "owner operator health insurance cost" ranks 10.2.
/blog/what-income-counts-for-aca-subsidies	997	12.7	Link to the calculator; add 2027 income-limit table ("aca subsidies 2027 income limits" gets 3.7% CTR).
/blog/how-much-does-health-insurance-cost-2026	856	8.3	Update to 2027. Redirect the duplicate cost page into it.
DOT physical pages (2)	1,246	4.7 / 10.1	Two pages on one topic. Merge into the stronger one (/does-health-insurance-cover-dot-physical).
Local: Coral Gables, Coral Springs, FL group plans	200+	6–10	Strong local rankings. Add these cities to your Google Business Profile and get reviews.

Clean up duplicate and thin pages

- **Duplicate URLs split your ranking power.** Examples: /how-much-does-health-insurance-cost (position 191) vs. the blog version (position 8); /blog/miami-small-business-health-insurance vs. the same URL with ".html"; two "how many employees for group health in Florida" posts; two "can truckers deduct health insurance" pages. Pick one winner for each and 301-redirect the other.

- **Too many near-identical pages.** 44 trucking URLs, 14 dental/vision state pages and ~25 city small-business pages. Pages that only swap the city or state name look thin to Google. Keep the few that earn impressions; merge the rest into one strong hub per topic.

- **Anchor links (#how, #qualify) are showing as separate results** for the owner-operator deduction post. That is fine, but confirm canonical tags point to the main URL.

Your 30-day action plan

#	Action	Why	Effort
1	Refresh the 2027 Open Enrollment Guide by Oct 15: dates in title, update content, add quote CTA and FAQ.	8,451 impressions at pos 13; searches spike Nov–Dec.	2–3 hrs
2	Rewrite titles & meta descriptions on the top 10 impression pages. Lead with the benefit + year + "free quote".	CTR is 0.48%; titles are the cheapest lever.	2 hrs
3	Build one trucking pillar page at /truck-driver-health-insurance. Merge weaker trucking posts into it, link every trucking post to it.	Owner-operator queries sit at pos 36–40 with 1,500+ combined impressions.	1 day
4	301-redirect duplicate pages (list on page 3).	Consolidates authority; stops pages competing.	1 hr
5	Put the ACA calculator in the site menu and link to it from every ACA article. Capture email/phone to show results.	It already converts clicks best; make it a lead form.	3–4 hrs
6	Add a sticky "Call / Text Bradley" button on mobile.	Half your clicks are mobile, with better CTR.	30 min
7	Set up lead tracking: GA4 conversions (or GoHighLevel form source) for quote, call and calculator submissions.	This export shows clicks, not leads. You need to know which pages produce clients.	1 hr
8	Google Business Profile: post weekly, request reviews from every client, list service areas (Miami, Coral Gables, Coral Springs, Broward).	Local queries already rank 6–10.	Ongoing

Deprioritize for now

- **Dental & vision state pages and "PPO insurance".** Big national competitors own these; you rank 60–80. Keep the main dental/vision page, stop adding state variants.
- **"Average cost of health insurance"** (2,652 impressions, position 218). Too broad; target "cost for truck drivers / small business in Florida" instead.
- **Publishing new pages at volume.** Improving the 225 you have will pay off faster than writing more.

What to measure each month

- Non-brand clicks (filter out "vs health") — the real growth number. Currently ~30 of the ~80 clicks with visible queries.
- Number of pages ranking in the top 10, and the position of your 5 priority pages.
- Quote requests, calls and calculator submissions by landing page.
- Rough target if the plan is executed: 300+ clicks/month by December, driven by Open Enrollment. Treat that as a directional estimate, not a promise.

Source: Search Console export "vshealthbenefits.com-Performance-on-Search-2026-09-21" (Chart, Queries, Pages, Countries, Devices). Query table covers the top 1,000 queries only; totals by page and by date differ slightly because of how Google aggregates.
